AT TOMBALL REGIONAL

Turning Couples into Families

When we met with the staff, consisting of Dr. Gill and Mary Lou, they made us feel like the world had not ended and that with proper medical treatment there was a strong possibility that we would indeed have a successful pregnancy. They did everything they could to reassure us, without giving us false hope, that we would have a family. Dr. Gill always had time to speak with me about my concerns and walked my husband and me through the whole process, both professionally and emotionally. I'll never forget the calm I felt the day I met with Dr. Gill and Mary Lou. Today, we have a 21-month-old, absolutely perfect, gorgeous, healthy little girl who is the definition of our lives. I thank (God) every day that there truly is a group of people in the world that wants to make families complete like Dr. Gill does. I recommend HFI to anyone and everyone who is at a point of frustration like we were. Thank you to Dr. Gill and his staff for completing us.

Houston

On Feb. 4, 2004, we were told about Dr. Gill's fertility practice by a labor/delivery nurse who had just given birth to a beautiful baby boy thanks to his help. My husband and I live in Austin and had looked high and low for someone of his caliber with no luck. Shortly after discovering his practice at the Houston Fertility Institute, my husband and I were well on our way. We had a few disappointments in the beginning, as my body would not respond to the drugs as it was

supposed to at first, but it didn't take long to get around that. Five months after our first meeting, I was pregnant with twin boys. Dr. Gill was amazing. However, he doesn't do it all alone. His colleagues are just as knowledgeable, caring and dedicated as he is. They are all up to date on the latest procedures and medications and are very skilled in determining just what the right protocol is for each individual. It's hard to believe that we are about to celebrate our twins 2-year-old birthdays. We continue to this day to thank God for our little miracles and for his use of Dr. Gill and his colleagues.

It was such a wonderful experience working with Dr. Gill and his staff. They were always more than willing to answer our questions and always addressed our individual concerns. Dr. Gill was quickly able to give us the results we were looking for. We now have a beautiful baby girl who wouldn't have been possible without all the staff from Houston Fertility Institute. We love referring other couples because of the great experience we had. Dr. Gill has a great way of relating to his patients and he is always up front and honest. We can't wait to go back again. Thanks again Houston Fertility Institute for making our dreams come true!
