

HOUSTON FERTILITY INSTITUTE "TURNING COUPLES INTO FAMILIES"

Is the joy of starting a family still just a dream waiting to come true? If you're having difficulty conceiving, you're not alone. One out of every six couples experience an infertility problem. Houston Fertility Institute can help. They have one of the highest pregnancy success rates in the Greater Houston area and provide high quality treatment with the understanding, compassion and attention you deserve.

Nine years ago Houston Fertility Institute (HFI) founder Jimmy Gill, M.D., set out to change how fertility services and treatments were provided. He envisioned a patient-centered philosophy of care where couples meet with their physician during each appointment instead of being referred to an ancillary provider after their first visit. "It's important to be available to patients every step of the way," Dr. Gill said. "We are patient and couple-oriented and know the benefits of individualized support."

Dr. Gill also sought innovative, cost-effective ways to treat the causes of infertility. He developed an all-inclusive rate for IVF as

well as a "risk-sharing plan". If you don't conceive after your first IVF cycle, all HFI physician fees for additional cycles are waived. Dr. Gill added, "This helps patients focus on the reason they're coming to see us—to conceive a child—instead of feeling stressed about extra costs."

HFI has outstanding pregnancy rates, 8 locations for their patients' convenience and staff members who are leaders in the field of infertility. HFI remains on the leading edge of the latest scientific advances and the newest technologies, programs and treatment options, including in-vitro fertilization (IVF), pre-implantation genetic diagnosis (PGD) and egg donation services.

The best fertility treatment in Texas is close to home and just a phone call away. Call Houston Fertility Institute today to schedule an appointment and allow them to help make your dream of becoming a family a reality. Also visit www.hfi-ivf.com for information on upcoming Patient Education seminars in your area.
